PR message: Hida-Kamioka High school is located in Hida-city, in the northern part of Gifu Prefecture.

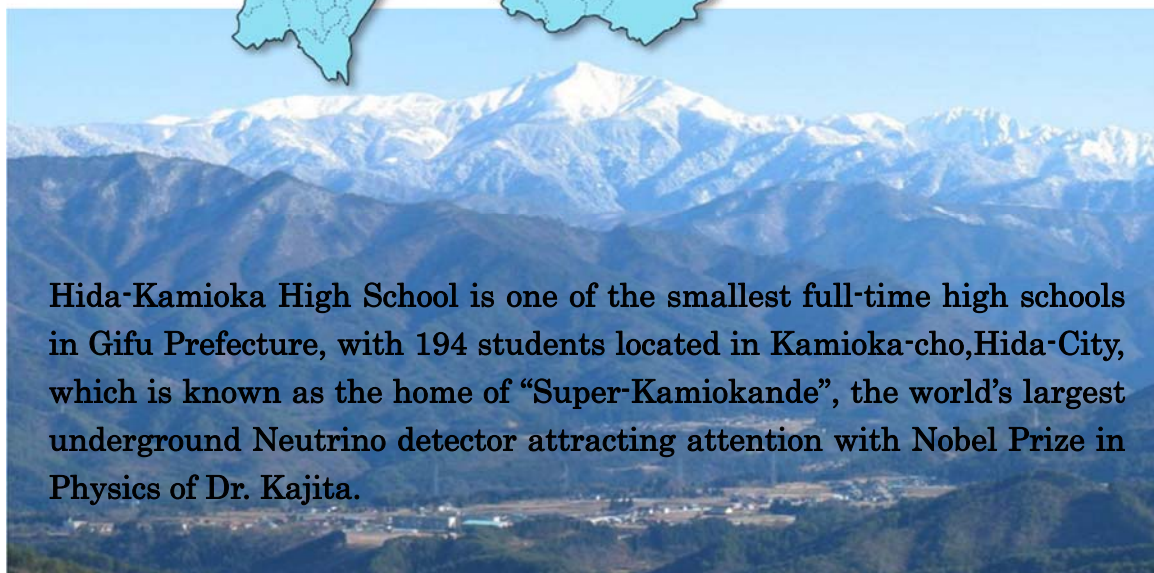

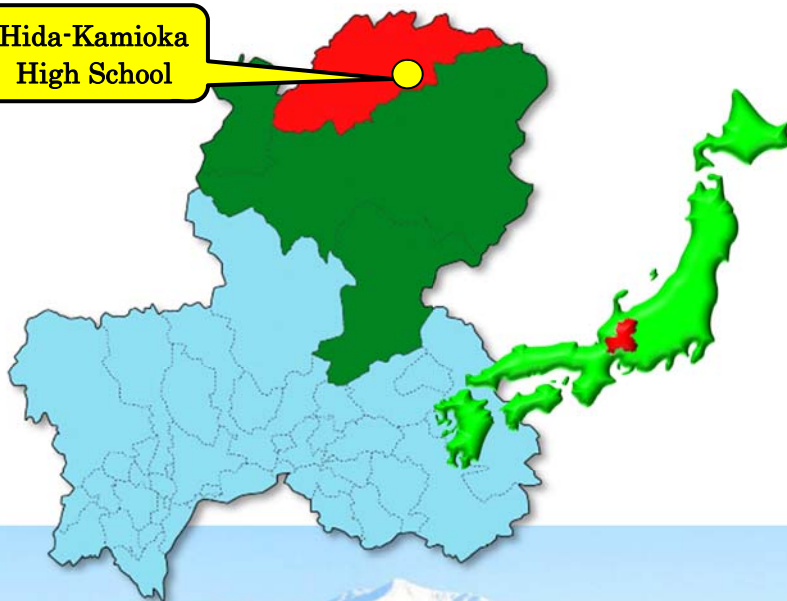

Hida-city has the Institute for Cosmic Ray

Research of Tokyo University " Super-

Kamiokande" and "KAGRA". Hida-city is also famous for being the stage of the animation movie "Your Name."

Hida-Kamioka
High School

Hida-Kamioka High School is one of the smallest full-time high schools in Gifu Prefecture, with 194 students located in Kamioka-cho, Hida-City, which is known as the home of "Super-Kamiokande", the world's largest underground Neutrino detector attracting attention with Nobel Prize in Physics of Dr. Kajita.

Education Policy

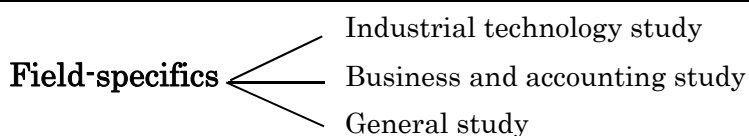

The school Mottoes are “Wisdom”, “Fraternity”, and Creativity”.

We aim to foster the human resources focused on the followings:

1. a harmonious, rich sense of humanity with knowledge, moral, and physical health
2. development of personality, ability and independence
3. high aspiration and wide perspective
4. contribution to development of region and society

Neutrino&KAGRA-Series

These robots were named Neutrino after the great discovery of neutrino, and are famous among the robot builders all over Japan.

ROBO-ONE

We are one of the leading teams in ROBO-ONE tournament, a martial art meet of the bipedal robots to select a top of the bipedal robots all over Japan.

International Robot Contest(IRC) in Korea

We have participated in an International Robot Contest held in Korea as a member of the Japanese team for 5 years in successions.

We won the first prize in the three fields last year: track and field, martial art and curling.
