

Nature around Ikeda High School

Ikeda High School is surrounded by a beautiful natural environment filled with rivers and mountains.

Higashi River flows along the school building. Rape blossoms are in full bloom around the school in April. You can enjoy seeing some natural fireflies which inhabit only in areas with clear water, like this beautiful river in fall.

Bright pink and white dogwoods in the courtyard in May

The fourth floor of the school building commands an extensive view of the rice field in Ikeda Town in the north.

Ikeda Town is favored with abundant water and has a lot of rice fields all over the town. This picture was taken during the rice harvest. You can see Ikeda High School and Mt. Ikeda in the background of the picture.

The autumn landscape from the connecting corridor of our two school buildings in November. We can enjoy seeing Mt. Ikeda turn red and yellow this season.

The view facing Ogaki City to the south from the fourth floor of school building.

Mt. Ikeda obscured by fog in January
