

Gifu prefectural Seki high school

Message from the president of a student council

The main work of the student council executives is management of events in the first term and volunteer activities in the second. The school festival and ballgame tournament show us the excitement of the whole school where bonds which surpass grades and class unity is born.

The reason why I became a candidate for the student council president was because the school festival I experienced as a 1st and 2nd grader was the highest level of enjoyment and I really wanted to be at the center of its management. The school events and the image of my fellow school students intently absorbing themselves to them is really attractive. We collaborate with all committee members, revise, convey information and give support so that all students can have fulfillment in daily life.
