参加者のスピーチ (一部抜粋)

- ◆ Because of my dislike of pink I learned to face my own biases. There will always be stereotypes and biases in this world, and it may be difficult to not allow them to cloud our judgement, but I want to try to live my life not swayed by these things.
- ◆ Do you like to eat? Of course, I love eating. When you go to a restaurant, do you always eat everything on your plate? When you were a middle school student, did you eat up school lunch? Today, I want you to consider the Food Loss.
- ◆ You can not only enjoy sightseeing but also remember something important that Japanese people nowadays tend to have lost; emotional connection with people and nature. Please come and visit Mino City. I'm very pleased to get this chance to introduce my hometown.
- ◆ My family has been completely changed by our four mobile phones. The IT era has come to my house. The first person to change was my grandmother. She started to use a flip phone. However, I think she had never used an electronic device except for a sphygmomanometer until then. I was surprised by that.
- ◆ Encounters affect people's lives. In addition, an encounter is always meaningful. Have you ever thought about encounters? I have had a wonderful encounter that changed my life. It was an encounter with a teacher 3 years ago.
